

# Final Database Description

## Description:

This project provides user to view information related to movies, for example, the director, score composer, writer, editor, runtime, genres, productions companies involved etc., of a particular movie. So, this database covers Movies, some of the people involved in making that film, and production companies involved in producing that movie. It has three different entities with their respective attributes.

- Movie's name and release year combined are assumed to be unique
- A person's name is assumed to be unique
- A production company's title is assumed to be unique
- Each movie has people working for it and each person might work on several movies
- Each movie has production companies funding it and each production company might produce many movies
